Vancouver Crane Safety Training

Vancouver Crane Safety Training - Both crane operator and their supervisors must know all the possible issues connected to the operation of an overhead crane. All across North America, there is legislation which provides regulation for the safe maintenance, operation and inspection of lifting equipment. Crane Safety courses help owners and managers of cranes accredit their drivers in accordance with provincial legislation.

Our operator safety training course would provide the crane operator trainee with the required skills and knowledge to be able to make lifting utilizing a crane safer and easier. Training the driver helps to extend the crane's life span by guaranteeing crane's high performance and safe operation.

Accredited operators are needed to operate and run articulated cranes under 16,000 lbs. capacity. The articulated crane operator needs to have knowledge concerning the many operational characteristics and features of the machine. Before use, a pre-operational machine check needs to be done. There is a legal prerequisite to perform a pre-operational check and a check of the work-site ground and overhead conditions.

The manufacturer's guidelines provide information concerning maintenance and inspection, unloading and loading of the crane. The law requires daily and annual inspections. Operators should maintain an up-to-date logbook within nearly all regions. They may be required to validate equipment warranties.

Adding remote control devices to the cranes is usually suggested. Remote control improves safety by enabling the operator an easier option for handling the crane.

Improving crane safety will often help a company's bottom line. Such companies which follow safe equipment practices would normally see bigger cost savings than businesses that don't. The possibility of machine damage and personal injury is greatly lessened if a well trained driver is handling the crane. Safety conscious drivers are more productive leading to reduced times needed for loading and unloading.
