Vancouver Forklift Training Courses

Vancouver Forklift Training Courses - When forklift operator safety training is customized for illiteracy, training time is lessened by half. Lift-truck operator driver safety training evaluation, train the trainer and forklift training certification programs provide regulation-compliant, thorough training in industrial-powered fork truck safety and utilization. Forklift pedestrian safety is offered too.

Learn with our highly skilled group of experts to be able to ensure that your staff are as well-trained as possible. Lift truck certification is delivered on site by certified instructors with many years of experience. Trainees would know how to spot possible dangers and carry out safety inspections needed for the efficient and safe use of a powered industrial lift truck.

Forklift Training Guidelines
The checklist below is vital for whatever workplace which has lift trucks on the premises. Each of these questions must be answered with "yes" if all the safety regulations and rules are being followed. A "no" to whichever question indicates a procedural flaw which might cause accident, injury or damage to equipment.

1) Is the traffic of the pedestrians separate from the operating are of the forklift?
2) Is access to forklift areas by pedestrians restricted by a barrier?
3) The walkways for pedestrians are well-marked?
4) A sign is clearly visible stating a "forklift in operation"?
5) There are mirrors provided at blind spots for operators and pedestrians?
6) Are alterations to daily forklift schedules communicated to all affected employees?
7) Are forklift tires suitable for utilization on all operating surfaces?
8) Lift truck seatbelt is being used?
9) Is the seat in good condition?
10) Is a regular forklift maintenance schedule followed?
11) Is a yearly forklift certification and inspection done?
12) Is the forklift right for the required tasks?
13) Does forklift has a load chart that is readable?
14) Can the operators read and understand the load chart?
15) Does the chart list the safe capacity for different attachments and uses?
16) Do the forklift warning devices work properly?
17) Is the operating speed control device fitted right?
18) Is overhead cage fitted correctly on the lift truck?
19) Have all forklift operators acquired certification?
20) Speed limits and warning signs are being observed?
21) The operators have current training for the forklifts being utilized?
22) Do operators understand their duties to report any equipment damage and lift truck accidents?
23) Is the pre-test checklist reviewed daily prior to the machinery being operated?
